Policy Regarding Use of Flash/Strobe Photography

There is no TAPPS rule or prohibition concerning flash or strobe photography during a volleyball or basketball game. If a coach requests that the flash/strobe not be used because of a safety or distraction issue, the photographer may be requested not to use flash or strobe photography. Absent such a request from the coach game officials are advised to allow use of flash or strobe photography. During regional and championship events only the contracted photographer is permitted to use flash or strobe photography unless a request is received from a coach regarding a safety or distraction issue.
